

Roman KC

Full-stack Product Engineer

Kathmandu, Nepal · romanchhetri02@gmail.com · romankc.com.np · github.com/romankc17 · linkedin.com/in/roman-kc-19911a1b0

I build and run production software for Nepali businesses — ERP, retail operations and marketplaces. End to end: schema and API design through to the interface people actually use, deployed and maintained — and the support conversation that follows.

EXPERIENCE

Junior Full Stack Developer Apr 2023 — Dec 2023

Beta Analytics Pvt. Ltd. · New Baneshwor, Kathmandu

- Built new features across a Django MVC codebase
- Data modelling, database queries and data-integrity work
- Worked directly with senior developers on requirements, planning and implementation

Elixir Developer, Intern May 2022 — Sep 2022

Tyrosoft Pvt. Ltd. · Kathmandu

- Functional programming in Elixir
- Built RESTful CRUD APIs designed for concurrency, fault tolerance and scalability
- First run through a full project lifecycle — collaboration, communication, iteration

PRODUCTS I DESIGN, BUILD AND OPERATE

KaaryaOne — configurable multi-tenant ERP In development

- Multi-tenant by agency and branch** — per-tenant module toggles and industry templates, so a clothing retailer and a distributor run the same core configured differently
- Accounting and inventory core** — invoicing, bills, expenses, cashflow, stock movements with variants and barcodes, POS sessions and role-based permissions
- Four clients, one API** — React 19 web app, Expo mobile, Electron desktop, Redis-backed WebSocket service for live updates
- Built on the Nepali fiscal calendar** — Bikram Sambat dates, VAT and TDS, NCM courier integration with per-tenant tokens so COD settles into each client's own account

Laravel 13 · PHP 8.4 · React 19 · TypeScript · PostgreSQL · Redis · Cloud Run · Playwright

BaasMandu — Kathmandu Valley rental marketplace Live · baasmandu.com

- Three roles, one marketplace** — renters browse and enquire, agents and owners list, admins moderate and run automations
- Automated image processing** — watermarking in Pillow, inpainting-based clean-up in OpenCV
- Organic growth engine** — SEO-led acquisition tracked through Google Search Console
- Bilingual TikTok DM auto-responder** that reads Nepali and English enquiries and replies with matching listings

Next.js 15 · Express · Prisma · PostgreSQL · Socket.IO · Expo · Python · Cloud Run

SKILLS

Backend	Laravel · PHP · Node.js · Express · Elixir · REST API design · multi-tenant architecture · RBAC
Frontend	React · Next.js App Router · TypeScript · Vite · Tailwind · Radix UI
Data	PostgreSQL · Prisma · Eloquent · Redis · schema & migration design · double-entry accounting models
Apps beyond the browser	Expo · React Native · Electron · Socket.IO · WebSockets
Infrastructure	Google Cloud Run · Cloud SQL · Cloud Build · GitHub Actions · Docker · Caddy · Cloudflare
Quality & tooling	Playwright end-to-end tests · QA automation · Python (Pillow, OpenCV, BeautifulSoup, pandas)

EARLIER PROJECTS

Automated passport form filling · Python · Django · 2022 · private repo
Automated biometric appointment scheduling on Nepal's online passport system, built to cope with the site's traffic spikes and walk applicants through the form. Cut the time to fill it manually by more than half.

Driving licence form automation · Python · Django · Selenium
Turned Nepal's online driving-licence application into a short form — applicants entered only the mandatory fields and the tool handled the rest of the submission flow.

EDUCATION & LANGUAGES

BSc. CSIT 2019 — 2022

Tribhuvan University, Institute of Science and Technology

Languages Nepali (native) · English (professional proficiency)
